Erbslöh products for wine treatment containing egg and milk ingredients

Dear Sirs

In view of the future duty of labelling when using certain protein-containing wine treatment agents, classified as allergenic, we have put together detailed information for you in our Blitz news 12/2007. You will find them on our website under www.erbsloeh.com.

The following Erbslöh products for wine treatment contain ingredients from egg or milk products:

Products on the basis of egg products:

- AlbuVin
- BactiCare

Products on the basis of milk products:

- Erbslöh-Mostgelatine
- CombiGel[®]
- PrePur
- Gerbinol Super[®]
- KalCasin Leicht löslich
- SensoVin[®]
- Vinpur Special[®]
- LittoClarvinyl
- LittoPréClar
- Gush-ex

The ingredients of these products will be stated on product labels and will be indicated in product specifications and technical product leaflets in future to assure that you – as the user – are in a position to observe labelling requirements.

Additionally we will provide you on demand, with information on allergens for every product which complies with the different standards, for instance, the International Food Standard. All ingredients listed in the EU-Directive which may lead to allergic or other incompatibility reactions are stated there.

Best regards

ERBSLÖH GEISENHEIM AG
