Erbslöh - a constant source of reliable quality!

FSSC 22000 certified

ERBSLÖH Geisenheim AG has responded to steadily increasing product quality and food safety requirements in the international market by successfully achieving FSSC 22000 certification in March 2017. After more than 20 years of ISO 9001 certification, the Rheingau beverage specialist has taken another important step for the industry. As a global supplier to the food industry, Erbslöh's latest certification now provides its customers with suitable proof of quality.

The FSSC 22000 certificate combines the ISO 22000 standard with Food Safety System Certification (FSSC) and is tailored to the food industry's needs.

It meets the requirements made of food industry suppliers by international commercial standards such as IFS and BRC.

Erbslöh has thus achieved another major milestone in its 125-year history, continuing to be a reliable, forward-looking supplier to the beverages industry.

The current FSSC 22000 certificate is available at www.erbsloeh.com/de/downloads/Zertifikate.

Erbslöh Geisenheim AG has been in existence for more than 100 years. Today our company specialises in processing and refining of fruit-based drinks and is a leader in research and development and the manufacture of treatment agents. Even Erbslöh's move into beverage technology more than 50 years ago was the result of an exceptionally innovative idea. This pioneering spirit is still what drives our family business. The challenge we face is to consistently think of the "future", both nationally and internationally. From when we were founded until today, we have been governed by the progressive opportunities which innovative products and processes open up for our customers.
