

## To whom it may concern

Geisenheim, January 2018

### GMO-Declaration for Alcohol free Products

Dear Sir or Madam,

We guarantee for the products listed in the annex that these products are neither a genetically modified organism (GMO) itself, nor do they contain any such organisms and that these products neither consist of GMOs, nor are they manufactured from or with the help of GMOs.

Erbslöh enzymes mentioned below are manufactured according to the traditional process. The microorganisms applied to release the enzymes are derived from the classical mutagenesis process, which is a natural ongoing strain development according to the principle by random. Particularly intended, technical modifications of the genetic material of the microorganisms, including the selfcloning technology are thus excluded.

Our suppliers have submitted corresponding declarations to us for the raw materials we apply for our products.

Consequently, the products named below are not subject to compulsory labelling according to the EU Regulations EC 1829/2003 and EC 1830/2003 on labelling, permission and traceability of genetically modified foodstuffs and feedstuffs. Furthermore the products fulfil the requirements of the current version of the EU Council Regulation Nr. 834/2007 in terms of the prohibition of GMOs

We will inform you in advance should the products no longer be in accordance with this confirmation.
