

VitaFerm® Ultra F3

Complex of essential nutrients of the inactive yeast for complete yeast nutrition

Product description

VitaFerm® Ultra F3 is a multi-nutrient complex which contains all the essential nutritional components from inactive yeast (such as amino acids, fatty acids, minerals, sterols, vitamins, etc.) for certain and successful fermentation.

Permitted as processing aid according to current EU laws and regulations. Tested for purity and quality.

Dosage

<i>Contents</i>	<p>Complex of essential nutrients:</p> <ul style="list-style-type: none"> ▪ Complex of essential nutrients from inactive yeasts and yeast cell walls: ▪ Peptides ▪ Mannoproteins ▪ Adsorptive yeast cell walls ▪ Saturated and unsaturated fatty acids ▪ Sterols - <i>especially ergosterol</i> ▪ Minerals ▪ Nucleotides – <i>supports the formation of aromas and flavour</i>
<i>Further ingredients</i>	<ul style="list-style-type: none"> ▪ Diammonium phosphate ▪ Thiamin
<i>Objective</i>	<ul style="list-style-type: none"> ▪ Provides the yeast with all essential nutrients to achieve an optimised fermentation ▪ For difficult fermentation conditions ▪ To avoid fermentation problems ▪ Part of the nutrient concept for producing fresh, fruity wines
<i>Other benefits</i>	<ul style="list-style-type: none"> ▪ Increases sources of complex nitrogens ▪ Promotes propagation ▪ Adsorption of fermentation-inhibiting substances ▪ Successfully avoids formation of off-flavours ▪ No residual sugar and clean fermentation profile ▪ Reduction of SO₂ binding partners (SO₂ reduction)
<i>Tip</i>	<ul style="list-style-type: none"> ▪ For complex wines suitable for laying down and with stable aroma profiles ▪ We recommend the VitaDrive® F3 yeast activator to mobilise optimum yeast metabolic performance
<i>Dosage</i>	Depending on nutritional situation in the grapes and processing technology
<i>Recommended and statutory maximum dosage (EU)</i>	<ul style="list-style-type: none"> ▪ Up to 100 g/100 L ▪ Staggered dosage (3 x 30 g/hL) optimises metabolic performance (first dose after addition of the yeast batch, other doses not later than 2/3 of the fermentation)
<i>Nitrogen discharge</i>	<ul style="list-style-type: none"> ▪ The nitrogen which can be used by yeast (YAN) is increased by 28 mg/L for a dosage of 20 g/100 L VitaFerm® Ultra F3
<i>Use</i>	<ul style="list-style-type: none"> ▪ Suspend the VitaFerm® Ultra F3 in juice or water and add to the fermentation vessel
<i>N.B.</i>	<ul style="list-style-type: none"> ▪ Nutrients with a high ammonium content must not be added to the rehydration batch
<i>Specifics</i>	<ul style="list-style-type: none"> ▪ Contains neutral anticaking agent to reduce clumping - suitable for storage

Storage

Store in a dry place, away from light. Packs which have been opened should be immediately tightly sealed and used up as soon as possible.
